

NITESH GUPTA

Ahmedabad, India | Niteshgupta5.dev@gmail.com | linkedin.com/in/Niteshgupta5 | github.com/Niteshgupta5 | +91-8871284558

PROFESSIONAL SUMMARY

Full-stack software developer with **3+ years of experience** building scalable web applications using React.js, Node.js, Express.js, and modern backend technologies. Proven expertise in **Agile development**, backend performance optimization, and integrating third-party services. Actively deepening skills in **LLM-based systems and Agentic AI workflows**. Passionate about writing maintainable, high-performance code and delivering exceptional user experiences at scale.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, C, C++, Python
Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, Nest Js, REST APIs, GraphQL, Microservices, JWT
Databases: MongoDB, PostgreSQL, MySQL, Prisma ORM, Redis
Cloud & DevOps: AWS (S3, EC2, Lambda), Docker, CI/CD, Web Sockets
Testing & Tools: Unit Testing, Integration Testing, Git, Jira, Postman, OOP
AI / ML: Claude AI, LLM APIs, Agentic AI Workflows, LangChain Fundamentals

WORK EXPERIENCE

Software Developer | Esparkbiz Technologies

Jun 2024 – Present | Ahmedabad, Gujarat

- Architected and shipped **full-stack applications** using Express.js, React, Node.js, Electron, and Prisma, cutting development time by **~2 weeks per project** and measurably improving user satisfaction scores.
- Improved backend performance by **optimizing database queries and API response times**, reducing server load and latency across all production services.
- Integrated **third-party APIs and external services** into production environments, expanding product capabilities without compromising system reliability.
- Refactored legacy codebases to **improve maintainability and reduce technical debt**, enabling faster feature delivery cycles across the engineering team.
- Participated in **Agile ceremonies** (sprint planning, standups, reviews, code reviews), driving on-time delivery and continuous improvement.

MERN Stack Developer | Glasier Inc.

Mar 2023 – May 2024 | Ahmedabad, Gujarat

- Developed **scalable full-stack web applications** using React.js, Next.js, Node.js, and Express.js serving high volumes of concurrent users.
- Designed and implemented **RESTful APIs** for user management and financial transactions, ensuring high availability, correctness, and security.
- Improved frontend performance by **optimizing rendering pipelines and backend logic**, resulting in faster load times and improved user retention metrics.
- Collaborated with **cross-functional teams** (design, QA, product) to deliver responsive, user-friendly interfaces aligned with business objectives.

KEY PROJECTS

Auth & Authorization SDK with Government Verification

Node.js · Blockchain · JWT

- Designed a **secure authentication and authorization SDK** for transactions between individuals, businesses, and government entities handling identity verification at scale.
- Integrated **government identity verification APIs** with tamper-proof, compliance-grade checks before processing sensitive requests.

- Implemented **data mining workflows** converting verified transactions into Virtual Data Tokens (VDTs) stored immutably on blockchain via Web3 team.
- Ensured **end-to-end encryption, privacy compliance, and RBAC-based access control** achieving audit-trail immutability guarantees within the SDK.

Pet Management Application

React.js · Node.js · PostgreSQL · RBAC

- Built a **veterinary practice management platform** supporting appointment scheduling, patient records, and multi-location clinic operations.
- Developed a **Google Calendar-like scheduling engine** with multi-location and multi-contact support, handling conflicts and real-time availability.
- Implemented **role-based access control (RBAC)** for patient evaluations, invoicing, historical records, and secure data access across all user roles.

Employee Management Hub

React.js · Node.js · MongoDB · SaaS

- Designed and deployed a **SaaS-based HR management platform** streamlining onboarding, attendance, leave, shift scheduling, and compliance workflows.
- Added **training management and complaint handling** modules significantly improving HR efficiency and reducing manual overhead.

Educational Institute Management System

React.js · Node.js · MySQL · Multi-tenant

- Developed a **centralized ERP platform** for universities and affiliated colleges managing students, faculty, courses, fees, and institutional operations.
- Delivered a **unified interface for students, faculty, and administrators** with hostel, canteen, and library management, eliminating manual processes institution-wide.

EDUCATION

Master of Computer Application (MCA)

2025

RGPV University — Awarded by GENIUS ACADEMICS | Bhopal, M.P.

Bachelor of Science in Information Technology

2021

DAVV University | Indore, M.P.

CERTIFICATIONS & TRAINING

- **C, C++, and Python Programming** — Indian Institute of Technology (IIT), Bombay
- **Advanced React.js** — Coursera — offered by Meta
- **Python Training** — Barclays LifeSkills Programme, GTT Foundation
- **AI Integration & System Design** — LLM APIs, Agentic AI Workflows, System Design Fundamentals — Udemey
